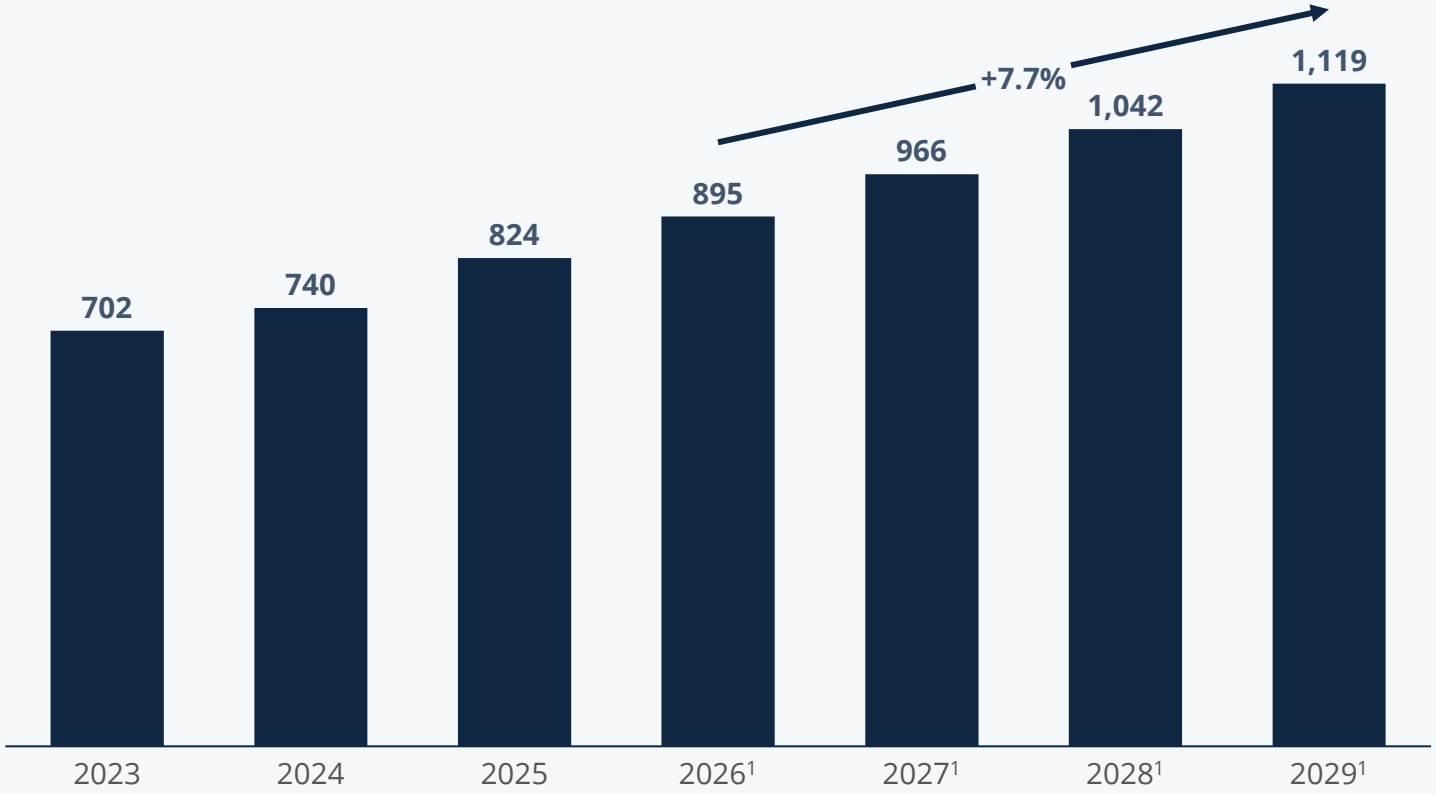
European E-Commerce Revenue Is Set to Surpass the US$1 Trillion Threshold in 2028, Reaching US$1.119 Trillion by 2029

E-Commerce revenue development in Europe, in billion US$



European e-commerce revenues have exceeded US$700 billion in 2023. The market is walking straight towards the US$1 trillion threshold with **revenues of US$895 billion in 2026**.

Forecasts for the subsequent years predict steady growth, at a compound annual growth rate (CAGR 2026-2029) of 7.7%, which is set to result in a market volume of US$1.119 trillion by 2029.

With an expected **increase of 8.5% in 2026**, European e-commerce is close to the global market's growth rate of 8.6%. It is above the growth rate of the Americas but below that of Asia, which signals Europe's continued potential for further expansion in the digital sector.

These numbers underline Europe's competitiveness globally, which is driven by a strong and expanding digital infrastructure, high internet penetration and a steadily growing base of online shoppers.

Notes: (1) Forecast. Market revenue represents B2C sales of physical goods including VAT. It excludes B2B sales, C2C sales, returns, compensation for damaged or missing goods, any discounts granted and services. Data shown is using current exchange rates.
